## Summary

Frontend developer with experience building React applications, component-based UI systems, and CMS-optimized content workflows. Skilled in JavaScript, reusable UI architecture, and Agile collaboration, with a background in QA processes and cross-functional product development. Passionate about delivering clean, scalable, and user-focused digital experiences.

## Skills

**Frontend:** JavaScript (ES6+), React, HTML5, CSS3 (Flexbox, Grid, Responsive Design)

**UI Systems:** Component-based architecture, Figma collaboration, design handoff workflows

**Tools:** Git/GitHub, Netlify, Chart.js, APIs, Chrome DevTools, VS Code

**Processes:** Agile/Scrum, QA workflows, documentation best practices

## Experience

### Digital Strategy & Content Operations Lead

*Various Roles, Nonprofit & Agency Settings | 2020–2025*

- Developed QA workflows and content templates that reduced web launch errors by 80% across 2,000+ digital assets annually.
- Partnered with product managers, designers, and developers to deliver CMS-driven web content on enterprise platforms.
- Documented reusable patterns for editorial content and digital campaigns to improve consistency across teams.
- Coordinated Agile sprints, ensuring on-time delivery of features and content updates.

## Projects

### [Untangled \(Decision-Making App\)](#) | React, CSS, LocalStorage

- Built an interactive decision-making app with reusable React components, state management, and conditional rendering.
- Deployed on Netlify with a responsive UI and localStorage persistence for user inputs.

### [Until Then: Countdown Journal](#) | HTML, CSS, JavaScript, LocalStorage

- Developed a countdown timer + journaling tool with localStorage data persistence and a clean, minimal UI.
- Focused on user experience and responsive design for both desktop and mobile.

### [Mental Health Dashboard](#) | JavaScript, API Integration, Chart.js

- Created a data visualization dashboard with interactive charts and filtering options.
- Planning React rebuild to introduce component-based architecture and scalable state management.

### [UI Design Gallery](#) | Figma

- Recreated 15+ UI screens in Figma to practice modern layout structure, visual hierarchy, and interface patterns, building foundational UI skills for front-end development.

## Education

### **SEO Essentials**

Semrush Certification | 2025
